We value everything you do to deliver quality care to our members — your patients — to ensure they have a positive healthcare experience.

There are several behavioral health measures that providers can directly impact related to follow-up care for mental illness or substance use disorders, and medication adherence. That’s why we’ve created this easy-to-use At-A-Glance Toolkit. It will give you the tools you need to meet, document, and code QRS measures. Together, we can provide the care and services our members need to stay healthy while also improving our quality scores. Please contact your Provider Relations Representative if you need more information or have any questions.
### HEDIS® Measure

**Antidepressant Medication Management (AMM)**

*Applicable Foster Care Measure*

#### Measure Specifications:
The percentage of members ages 18 and older who were newly treated with an antidepressant medication (no claims for a period of 105 days prior) with a diagnosis of major depression and who remained on an antidepressant medication treatment. Two rates are reported:

- **Effective Acute Phase Treatment.** Members who remained on an antidepressant medication for at least 84 days (12 weeks).
- **Effective Continuation Phase Treatment.** Members who remained on an antidepressant medication for at least 180 days (6 months).

#### Applicable Lines of Business:
- Medicaid
- Medicare
- Marketplace

#### Age Group:
- 18 years and older

#### Exclusion(s):
Members who are in hospice or members who do not have a diagnosis of major depression.

#### Measurement Period:
The 12-month window starting on May 1 of the year prior to the measurement year and ending on April 30 of the measurement year.

### Intent and Recommendations

**Measure Intent:**
Provides an opportunity to track antidepressant use in patients and provide appropriate follow-up care to monitor clinical worsening and/or suicide risk.

- Before diagnosing a patient with major depression, complete a comprehensive medical exam, including lab testing, which may identify a metabolic cause of depression. Accurate diagnosis drives appropriate treatments and interventions. Rule out medical or mental disorders that can produce symptoms similar to depression.
- Manage patient’s depression with a systematic approach for accurate assessment and diagnosis. Begin with a nationally recognized tool such as the Patient Health Questionnaire (PHQ-9) using the billing code 96127 in conjunction with the ICD-10 diagnosis code Z13.

#### Antidepressant Medications:
- Bupropion
- Vilazodone
- Vortioxetine
- Isocarboxazid
- Phenelzine
- Selegiline
- Tranylcypromine
- Nefazodone
- Trazodone
- Amitriptyline-chlordiazepoxide
- Amitriptyline-perphenazine
- Fluoxetine-olanzapine
- Desvenlafaxine
- Duloxetine
- Levomilnacipran
- Venlafaxine
- Citalopram
- Escitalopram
- Fluoxetine
- Fluvoxamine
- Paroxetine, Sertraline
- Maprotiline
- Mirtazapine
- Amitriptyline
- Amoxapine
- Clomipramine
- Desipramine
- Desvenlafaxine, Doxepin (>6 mg)
- Imipramine
- Nortriptyline
- Protriptyline
- Trimipramine

### HEDIS® Measure

**Initiation and Engagement of Substance Use Disorder Treatment (IET)**

**Measure Specifications:**
The percentage members ages 13 and older with a new episode of substance use disorder (and no substance use disorder diagnoses within the past 194 days) who received the following:

- **Initiation of Substance Use Disorder Treatment.** The percentage of members who initiate treatment through an inpatient substance use disorder admission, outpatient visit, intensive outpatient encounter or partial hospitalization, telehealth, or medication treatment within 14 days of the diagnosis.
- **Engagement of Substance Use Disorder Treatment.** The percentage of members who initiated treatment and who were engaged in ongoing substance use disorder treatment within 34 days of the initiation visit.

**Applicable Lines of Business:**
- Medicaid
- Medicare
- Marketplace

**Age Group:**
13 years and older

**Exclusion(s):**
Members in hospice or substance use disorder episodes that occurred during the 194 days prior to the new substance use disorder episode date.

**Measurement Period:**
New episodes of substance use disorder, Nov. 15 of the year prior to the measurement year through Nov. 14 of the measurement year.

### Intent and Recommendations

**Measure Intent:**
Individuals who engage in early substance use disorder treatment have been found to have decreased odds of negative outcomes, including mortality. The intent of this measure is to measure access to evidence-based substance use disorder treatment for patients beginning a new episode of treatment.

- A PCP or medical specialist, along with BH practitioners and providers, may provide the substance use disorder diagnosis in a variety of settings, such as, but not limited to, a medical ED visit, PCP office visit, acute IP medical treatment, or treatment for detox. Once the patient has a new substance use disorder diagnosis, the initiation phase begins.
- Schedule the initial 14-day follow-up visit within 10 days of a new substance use disorder diagnosis to allow flexibility in rescheduling.
- Utilize telehealth options if needed.
- At the end of the initial follow-up appointment, schedule two more appointments to occur within 34 days of the initial visit.

### Coding and Services

*ICD-10 AOD Abuse and Dependence and Substance Induced Disorder Codes: F10.xx-F19.xx (excludes remission codes)

**Visit Setting Unspecified **CPT** Codes:**
- 90791-90792, 90832-90834, 90836-90840, 90845, 90847, 90849, 90853, 90875-90876, 99221-99223, 99231-99233, 99238-99239, 99251-99255

**Outpatient POS:** 03, 05, 07, 09, 11-20, 22, 33, 49, 50, 71-72

**BH Outpatient **CPT** Codes:**
- 98960-98962, 99078, 99201-99205, 99211-99215, 99241-99245, 99341-99345, 99347-99350, 99381-99387, 99391-99397, 99401-99404, 99411-99412, 99483, 99492-99494, 99510

**Partial Hospitalization POS:** 52

**Partial Hospitalization/Intensive Outpatient HCPCS Codes:**

**Non-residential Substance Abuse Treatment Facility POS:** 57-58

**Community Mental Health Center POS:** 53

**Telehealth POS:** 02

**Substance Use Disorder Services HCPCS Codes:**
- G0396-G0397, G0443, H0001, H0005, H0007, H0015-H0016, H0022, H0047, H0050, H2035-H2036, T1006, T1012
